ENVIRONMENTAL CONSERVATION

USCG
SECTOR ANCHORAGE

USEPA (REGION X)
ALASKA OPERATIONS OFFICE

XXXXX, 2017

LETTER OF PROMULGATION

1. The Northwest Arctic Subarea Contingency Plan is the guideline for establishing operations in the event of a major response effort to an oil spill or hazardous material release. This volume supplements the *Alaska Federal/State Preparedness Plan for Response to Oil and Hazardous Substance Discharges/Releases* (Unified Plan).
2. Information contained herein will be disseminated to agencies and personnel involved in various response and cleanup activities.
3. The Northwest Arctic Subarea Contingency Plan is the result of a joint planning effort. Members of the U.S. Environmental Protection Agency, U.S. Coast Guard, Alaska Department of Environmental Conservation, U.S. Department of the Interior, and numerous other Federal, State, local, Native and industry participants contributed to this document.
4. We solicit comments and recommendations to improve this plan. Please submit your comments to the Northwest Arctic Subarea Committee, c/o the Alaska ARRT via their website at <http://alaskarrt.org/Comment/Default.aspx>, or by mail, to USEPA, Alaska Operations Office, ATTN: Nick Knowles, 222 W. 7th Ave., Anchorage, AK 99513.

Robert Whittier
Federal On-Scene Coordinator, USEPA
Region X (Alaska Operations Office)

Sean MacKenzie
Captain, USCG
Federal On-Scene Coordinator
Captain of the Port, Western Alaska

Tom DeRuyter
State On-Scene Coordinator, ADEC
Northern Alaska Response Team

NORTHWEST ARCTIC SUBAREA CONTINGENCY PLAN

TABLE OF CONTENTS

NOTE: Table of Contents will be updated for Final Plan.

Letter of Promulgation	i
Table of Contents	iii
Unified Plan and Subarea Contingency Plan Descriptions	ix
Record of Changes	xi
Federal National Response Center Notification	xiii
State Oil and Hazardous Substance Spill Notification Placard	xv

A. RESPONSE

PART ONE NOTIFICATION	A-1
A. Emergency Response Notification List	A-1
B. USCG and Federal Agency Contacts	A-2
C. Alaska State Agency Contacts	A-3
D. Local Contacts	A-4
E. Other Points of Contact	A-8
PART TWO EMERGENCY RESPONSE	A-9
A. Unified Command Structure and ICS	A-9
B. Roles of the OSC, RP, RAC/OSRO, and RSC	A-10
PART THREE RESPONSE PROCEDURES	A-12
A. Response Objectives	A-12
B. Scope of Activities	A-12
C. Ramp up Procedures	A-14
D. Additional Response Protocols	A-16
E. Potential Places of Refuge	A-18
F. Geographic Response Strategies	A-18
G. Emergency Towing System	A-18
H. Marine Response and Salvage Recovery	A-18

B. RESOURCES

PART ONE COMMUNITY PROFILES	B-1
A. Regional Organizations	B-1
1. Borough Regional Organizations	B-1
2. Unorganized Area Regional Organizations	B-1
B. Community Profiles	B-2
PART TWO EQUIPMENT	B-69
A. Contacts for Response Equipment	B-69
1. U.S. Government	B-69

2. Industry and Spill Cooperatives	B-70
B. Commercial, Industry, and Spill Cooperative Equipment	B-71
C. Government Spill Response Equipment	B-72
1. Federal Spill Response Equipment	B-72
2. State/Local Spill Response Equipment	B-74
PART THREE INFORMATION DIRECTORY	B-75
A. Airports and Air Services.....	B-76
B. Bird and Other Wildlife Response.....	B-79

UNIFIED PLAN & SUBAREA CONTINGENCY PLAN DESCRIPTIONS

The Northwest Arctic Subarea Contingency Plan is a supplement to the *Alaska Federal/State Preparedness Plan for Response to Oil & Hazardous Substance Discharges/Releases* (commonly referred to as the Unified Plan). The Unified and the Subarea Contingency Plans represent a coordinated and cooperative effort by government agencies and were written jointly by the U.S. Coast Guard, the U.S. Environmental Protection Agency, and the Alaska Department of Environmental Conservation. The Oil Pollution Act of 1990 (OPA 90) requires the USCG and the USEPA to prepare oil spill response plans for the State of Alaska, which is designated as an entire planning region under Federal guidelines. Alaska statute requires the ADEC to prepare a state-wide master plan addressing oil and hazardous substance discharges. The Unified Plan meets these Federal (NCP and OPA 90) requirements for regional and area planning, as well as State planning requirements.

OPA 90 requires the development of Area Contingency Plans for the inland and coastal zones of each Federal region. For the Alaska region, there are three Coast Guard Captain of the Port zones and one inland zone. The three Captain of the Port zones are: 1) Southeast, which covers all of Southeast Alaska; 2) Prince William Sound, which covers the Prince William Sound area; and 3) Western Alaska, which includes the rest of coastal Alaska from Cook Inlet out to the Aleutians and north to the Beaufort Sea and the Canadian border. The inland zone is subdivided into two sectors: 1) the North Slope oil production area and the Trans-Alaska Pipeline System (TAPS) and 2) all other areas inland from the coastal zones.

Alaska statute divides the state into ten regions for oil and hazardous substance spill planning and preparedness. The USCG and the USEPA joined with the ADEC to use these ten regions for area planning instead of the Federal planning divisions since this would facilitate unified planning for the State of Alaska and prove more practical as well (for example, the huge COTP Western Alaska planning area is replaced by seven more manageable divisions). Because the State of Alaska is called a planning region under Federal planning guidelines and to avoid confusion with the other Federal term, area contingency plans, these ten subordinate planning regions of the State are called subareas in the context of the Unified Plan.

The Unified Plan contains information applicable to pollution response within the entire State of Alaska and meets the pollution response contingency planning requirements applicable to the Federal and State governments. The plan provides broad policy guidance and describes the strategy for a coordinated Federal, State and local response to a discharge, or substantial threat of discharge, of oil and/or a release of a hazardous substance within the boundaries of Alaska and its surrounding waters.

Under both Federal and State law, the responsible party for an oil or hazardous substance incident is required to report the incident and mount a response effort to contain and clean up the release. The Federal and State governments mandate response plans for oil tank vessels and facilities that have stringent spill response requirements. If the responsible party fails to respond adequately or if no responsible party can be identified, then the Federal and State governments will rely on the Unified Plan and the appropriate Subarea Contingency Plan for response protocols and guidance.

Whereas the Unified Plan contains general information for response efforts taking place anywhere in the State of Alaska, the Subarea Contingency Plan (SCP) concentrates on issues and provisions specific to its particular subarea. The Northwest Arctic SCP focuses on the Northwest Arctic Borough and the Seward Peninsula region of the State. The boundaries of this subarea are described in the Background Section of this plan. The Northwest Arctic SCP provides information specific to the area, including emergency response phone

numbers, available response equipment and other resources, specific response guidelines, and information on hazardous substance presence and sensitive areas protection.

Alaska State statute mandates a public review of all new plans, an annual departmental review of these plans, and another public review whenever the plans are significantly revised. The ADEC offers a public review of these plans for a period of 30 to 60 days during which verbal and written comments are accepted. During this comment period, public meetings may be held at locations appropriate for the plan being reviewed. The Federal government does not require public review for any of its plans, though the USCG and the USEPA, as part of the Alaska unified planning process, do cooperate with the State of Alaska and participate in the public review process.

Neither federal nor the State regulations codify a formal approval process for these plans. The Unified Plan and the SCPs are presented to the Alaska State Emergency Response Commission and the Alaska Regional Response Team (ARRT) for review and comment. The Unified Plan approval process can be found in Annex D of the plan. For subarea contingency plans, the plan approval occurs with the signing of the plan's letter of promulgation by the three plan holders – the USCG, the USEPA and the State of Alaska.

REPORT ALL OIL AND HAZARDOUS SUBSTANCE SPILLS

ALASKA LAW REQUIRES REPORTING OF ALL SPILLS

During normal business hours
contact the nearest DEC Area Response Team office:

Central Alaska	Anchorage	phone: (907) 269-3063 fax: (907) 269-7648
Northern Alaska	Fairbanks	phone: (907) 451-2121 fax: (907) 451-2362
Southeast Alaska	Juneau	phone: (907) 465-5340 fax: (907) 465-2237

Outside normal business hours, call:
1-800-478-9300 (International 1-907-428-7200)

Alaska Department of Environmental Conservation
Division of Spill Prevention and Response

rev. June/2010

Discharge Notification and Reporting Requirements

AS 46.03.755 and 18 AAC 75 Article 3

Notification of a discharge must be made to the nearest Area Response Team during working hours:

Anchorage (907) 269-3063

(907) 269-7648 (FAX)

Fairbanks (907) 451-2121

(907) 451-2362 (FAX)

Juneau (907) 465-5340

(907) 465-2237 (FAX)

OR

to the 24-Hour Emergency Reporting Number during non-working hours:

1-800-478-9300 (International 1-907-428-7200)

Notification Requirements

Hazardous Substance Discharges

Any release of a hazardous substance must be reported as soon as the person has knowledge of the discharge.

Oil Discharges

■ TO WATER

- Any release of oil to water must be reported as soon as the person has knowledge of the discharge.

■ TO LAND

- Any release of oil in **excess of 55 gallons** must be reported as soon as the person has knowledge of the discharge.
- Any release of oil in **excess of 10 gallons, but 55 gallons or less**, must be reported within 48 hours after the person has knowledge of the discharge.
- A person in charge of a facility or operation shall maintain, and provide to the Department on a monthly basis, a written record of any discharge of oil **from 1 to 10 gallons**.

■ TO IMPERMEABLE SECONDARY CONTAINMENT AREAS

- Any release of oil **in excess of 55 gallons** must be reported within 48 hours after the person has knowledge of the discharge.

Special Requirements for Regulated Underground Storage Tank (UST) Facilities*

If your release detection system indicates a possible discharge, or if you notice unusual operating conditions that might indicate a release, you must notify the Storage Tank Program at the nearest DEC Office within 7 days:

Anchorage (907) 269-7886

(907) 269-7679

*Regulated UST facilities are defined at 18 AAC 78.005 and do not include heating oil tanks.
